VOLUME 151, ISSUES 1–3 1 OCTOBER 2001

Special Issue: Transformation of Plantation Forests

Preface 1

Part 1: Ecological Aspects of Transformation

The transformation of conifer forests in Britain — regeneration, gap size and silvicultural systems
D.C. Malcolm (Edinburgh, UK), W.L. Mason (Midlothian, UK) and G.C. Clarke (Old Aberdeen, UK) 7

Influence of overstorey basal area on density and growth of advance regeneration of Sitka spruce in variably thinned stands
L.M. Page, A.D. Cameron (Aberdeen, UK) and G.C. Clarke (London, UK) 25

A preliminary survey of regeneration of Sitka spruce in wind-formed gaps in British planted forests
C.P. Quine (Midlothian, UK) 37

Understorey environment and vegetation response after partial cutting and site preparation in *Pinus strobus* L. stands
S. Wetzel (Sault Ste. Marie, Canada) and D. Burgess (Victoria, Canada) 43

Light regime beneath Sitka spruce plantations in northern Britain: preliminary results
S.E. Hale (Midlothian, UK) 61

Structure and dynamics of an undisturbed old-growth Norway spruce forest on the rising Bothnian coastline
J.S. Svensson and J.K. Jeglum (Umeå, Sweden) 67

Part 2: Silviculture of Transformation

The silviculture of transformation — a commentary
K.L. O'Hara (Berkeley, CA, USA) 81

Opportunities and strategies of transforming regular forests to irregular forests
J.-P. Schütz (Zürich, Switzerland) 87

Target diameter harvesting — a strategy to convert even-aged forests
H. Sterba (Wien, Austria) and A. Zingg (Birmensdorf, Switzerland) 95

Management of transformation in central Europe
G. Kenk and S. Guehne (Freiburg, Germany) 107

Part 3: Quantification of the Transformation

Quantifying the implications of transformation from even to uneven-aged forest stands
J. Buongiorno (Madison, WI, USA) 121

Structure transformation and volume increment in Norway spruce-dominated forests following contrasting silvicultural treatments
E. Lähde, O. Laiho and Y. Norokorpi (Vantaa, Finland) 133

Transition matrix for modeling the dynamics of a subtropical seminatural forest in southern Brazil
P. Spathelf and M.A. Durlo (Santa Maria, Brazil) 139

Computer-aided choice of trees for felling
M. Hagner, P. Lohmander (Umeå, Sweden) and M. Lundgren (Robertsfors, Sweden) 151

On economic consequences of transformation of a spruce (*Picea abies* (L.) Karst.) dominated stand from regular into irregular age structure
T. Knoke and N. Plusczyk (Freising, Germany) 163

PII: S0378-1127(01)00703-4

Economic aspects of the transformation from even-aged pure stands of Norway spruce to uneven-aged mixed stands of Norway spruce and beech
M. Hanewinkel (Freiburg, Germany) 181
Transformation of plantation forests — expected wood properties of Norway spruce (*Picea abies* (L.) Karst.) within the period of stand stabilisation
U. Seeling (Freiburg, Germany) 195
Statistical power in forest monitoring
J.R. Foster (Fort Lewis, WA, USA) 211
